

Training - Peace Mediators (20 Hours)

This specialized training equips individuals with the skills to mediate conflicts effectively, embody inner peace, and empower others in peaceful conflict resolution. True peace mediation begins within; only a person free from internal conflicts, past traumas, and hidden agendas can authentically mediate peace for others. A mediator carrying unresolved issues, emotional scars, or personal discord, despite advanced training, may struggle to foster genuine harmony.

This program emphasizes the importance of self-reflection, inner peace, and conflict-free living as foundational qualities for effective mediators. Through this holistic approach, participants will learn not only to resolve disputes peacefully but also to enjoy and embrace the process, thereby becoming positive forces for peace in their communities and contributing meaningfully to a more harmonious world
